UBIC Completes Providing its First Training Program Regarding Advanced Digital Investigation and Analysis Techniques for Law Enforcement

TOKYO, March 31, 2016 (GLOBE NEWSWIRE) -- UBIC, Inc. (Nasdaq:UBIC) (TSE:2158) ("UBIC" or "the Company"), a leading provider of artificial intelligence (AI)-based big data analysis services, announced today that it has completed providing a one-year training program regarding advanced digital investigation and analysis techniques to the Kanagawa Prefectural Police's cyber-crime investigation team. Starting in April, UBIC will reengage the Kanagawa Prefectural Police department to provide another similar one-year training program.

UBIC launched this training program in April 2015, recognizing the urgency for law enforcement to develop sophisticated investigative and analytic practices to examine digital data. UBIC understood the need to provide the police with tools to combat increasingly complex and sophisticated cyber-crimes and other, related crimes. UBIC utilizes cutting-edge technology and sophisticated proprietary AI systems to develop and provide digital forensic products to support the discovery of evidence in legal cases, including international litigation and civil suits, and cases involving potential employee wrongdoing.

In the police training program, UBIC supported the advancement of investigation technology and techniques employed by the Kanagawa Prefectural Police in cyber-crime cases by providing various curricula regarding the use of AI among other advanced technologies and the handling of data. One police officer who participated in the program said, "Through this practical training, I not only learned techniques necessary for dealing with existing types of crimes, but also gained a perspective and attitude to prepare for what the future may have in store." In order to further improve techniques and readiness, a similar training program will be provided to officers in the Kanagawa Prefectural Police again in 2016.

On March 29, 2016, following the completion of the 2015 training program, UBIC held a commemorative ceremony for the members of the cyber-crime investigation team who finished the program and awarded them a certificate designating them as UBIC Certified Examiners.

Since its establishment, UBIC has been providing products and services to law enforcement agencies as Japan's pioneer in digital forensic support. It is one of the few Japanese companies engaging in this business. UBIC will continue to contribute to the realization and development of a secure and safe society through its investigation and analysis technology.

About UBIC, Inc.

UBIC, Inc. (Nasdaq:UBIC) (TSE:2158) supports the analysis of big data based on behavior informatics by utilizing its technology, "KIBIT". UBIC's KIBIT technology is driven by UBIC AI based on knowledge acquired through its litigation support services. The KIBIT incorporates experts' tacit knowledge, including their experiences and intuitions, and utilizes that knowledge for big data analysis. UBIC continues to expand its business operations by applying KIBIT to new fields such as healthcare and marketing. UBIC was founded in 2003 as a provider of e-discovery and international litigation support services. These services include the preservation, investigation and analysis of evidence materials contained in electronic data, and computer forensic investigation. UBIC provides e-discovery and litigation support by making full use of its data analysis platform, "Lit i View[®]", and its Predictive Coding technology adapted to Asian languages.

Safe Harbor Statement

This announcement contains forward-looking statements. These forward-looking statements are made under the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995. These statements can be identified by terminology such as "will," "expects," "anticipates," "future," "intends," "plans," "believes," "estimates" and similar statements. Among other things, the amount of data that UBIC expects to manage this year and the potential uses for UBIC's new service in intellectual property-related litigation, contain forward-looking statements. UBIC may also make written or oral forward-looking statements in its reports filed with, or furnished to, the U.S. Securities and Exchange Commission, in its annual reports to shareholders, in press releases and other written materials and in oral statements made by its officers, directors or employees to third parties. Statements that are not historical facts, including statements about UBIC's beliefs and expectations, are forward-looking statements. Forward-looking statements involve inherent risks and uncertainties. A number of factors could cause actual results to differ materially from those contained in any forward-looking statement,

including but not limited to the following: UBIC's goals and strategies; UBIC's expansion plans; the expected growth of the data center services market; expectations regarding demand for, and market acceptance of, UBIC's services; UBIC's expectations regarding keeping and strengthening its relationships with customers; UBIC's plans to invest in research and development to enhance its solution and service offerings; and general economic and business conditions in the regions where UBIC provides solutions and services. Further information regarding these and other risks is included in UBIC's reports filed with, or furnished to the Securities and Exchange Commission. UBIC does not undertake any obligation to update any forward-looking statement, except as required under applicable law. All information provided in this press release and in the attachments is as of the date of this press release, and UBIC undertakes no duty to update such information, except as required under applicable law.
